# Combining Energy Access and Climate Protection

## How Energy Can be Provided Sustainably, Reducing Emissions and Increasing Wellbeing

This publication highlights sustainable energy solutions that improve energy access and livelihood even as they reduce greenhouse-gas emissions. It is produced by INFORSE, the *International Network for Sustainable Energy*, in cooperation with ENDA/ INFORSE-West Africa, INSEDA/ INFORSE-South Asia, and the Mali Folkecenter.

Many people have contributed to this publication, and we thank them for their contributions. The primary contributors to each case are listed at the start of the case on which they worked.

Editors: Djimingue Nanasta, Gunnar Boye Olesen, and Raymond Myles.

### Table of Contents

Energy Access and Climate Protection – Overview and Conclusions	page 4
Solar Lantern for Rural Household Lighting and Cell Phone Charging in Mali. Mali Folkecenter	page 7
Jatropha oil production for local energy use, Mali. Mali Folkecenter	page 12
"A Household, a Solar Lamp" Project in Togo. ATODES/ENDA	page 16
Baking Ovens: Promotion of Improved Hybrid Ovens Using Gas/woodfuel in Senegal. ENDA	page 23
The Impact of the Removal of the Subsidy on LPG on Households, Small Production Companies, and Market Services in Senegal. ENDA	page 27
Carbon Credit under the Gold Standard for Household Biogas Plants, India. INSEDA	page 31
Appropriate Renewable Energy Using Bamboo and Wood within the Eco-Village Developments. INSEDA and WAFD	page 39
Income Generation for Poor Women through Solar Dryers in India. AIWC	page 49
Commercialisation of "Anagi" Improved Cookstoves in Sri Lanka. IDEA	page 58

The cases were collected in the framework of the Programme "*Southern Voices on Climate Change*". The Programme is made by a consortium of five Danish NGOs, Climate Action Network and IIED. It is coordinated by CARE Denmark and funded by the Danish International Development Agency (DANIDA). INFORSE activities also include INFORSE-South Asia, INFORSE-Africa, INFORSE-Europe, and the Danish INFORSE member "Sustainable Energy" (in Danish: VevarendeEnergi).
