

INFORSE - Suswath Kenya - INSEDA - SE UNFCCC COP27 SIDE EVENT (Blue Zone) Local Climate Sustainable Energy Solutions in Global Stocktake (GST) Why, How and From Where

Local solutions are important for climate targets and must be better included in GST. We present local climate solutions from 3 continents
How to include them in GST, overview of differences they can make for global climate mitigation, adaptation, faster GHG reductions, poverty, and gender.

**Sat. 12/11 2022
at 15.00-16.30
Side Event Room
Memphis**

Program

15.00 Opening by organisers INFORSE, INSEDA (India), Suswath (Kenya), SE Denmark

- Promoting local solutions as important climate and development solutions in East Africa, *by Mary Swai, INFORSE East Africa, TaTEDO Tanzania (online)*
- Launch of scenario and proposals for transition to 100% renewable energy in Uganda, replacing fossil fuels and ending overconsumption of wood and other biomass, *by Richard Kimbowa, Uganda Coalition for Sustainable Development (UCSD) INFORSE East Africa Chair (online)*
- Local solutions in GST including finance, key message from East Africa, 100 % Renewable Scenario *by Nobert Nyandire, Suswath Kenya*
- Paris compatible scenarios for reducing emissions in Europe with transition to 100% renewable energy, energy efficiency and energy sufficiency, key message for GST for Europe, *by Gunnar Boye Olesen, Sustainable Energy (Denmark) and INFORSE-Europe.*
- Promoting local activities in South Asia supported by eco-village development initiatives, *by Anzoo Sharma, Center for Rural Technology (CRT/N), Nepal*
