### UNFCCC SB 58 Side Event, June 10, 2023, Bonn Germany; TITLE: Sustainable Lifestyles for Climate Action for ALL Program

Welcome by the organisers, INFORSE, Fraunhofer Institute, REScoop.eu, Sustainable Energy

- The potential of and policies needed for energy communities to play their role in reducing emissions in Europe,  
by Chris Vrettos from REScoop.EU
- Sufficiency and more sustainable lifestyles as a driver for reducing climate impacts and resource use. Intro to Concept.
- What characterises more sufficient lifestyles in a European context, Result of a survey of 9000 people across Europe.  
by Josephine Tröger and Abigail Alexander-Haw, Fraunhofer Institute for Systems and Innovation Research, Germany
- Policies that can support sufficiency initiatives in Germany, Italy, France, Denmark and Latvia, leading to more sufficient lifestyles, including in food, transport, and housing. Enablers & barriers.  
by Philipp Schepelmann, Wuppertal Institute, Germany
- Quantifying the climate effects of sufficiency policies and measures, (Clever scenario, which is modelling future energy use and climate effects in Europe with focus on more sufficient lifestyles.)
- Policies for energy communities and sufficiency in the current national climate plans and Nationally Determined Contributions. Our recommendations for increased focus on energy communities and sufficiency in the coming NDCs,  
by Gunnar Boye Olesen, INFORSE-Europe, SE, Denmark.

Panel debate, including inputs from the audience
