COP30 BRASIL
AMAZONIA
BELEM 2025

10-21 November 2025

Blue Zone:
100% Renewables, Local Climate Solutions
in Africa, Europe, South Asia inforse.org/cop30.php

Side Event: Tue. 11 Nov., 18:30-20:00 ROOM #7
Exhibition: Booth #24 on 10-15 Nov. (Mon-Sat)

INFORSE-Europe participated at UNFCCC COP30 in Belem as part of the global INFORSE with:

- Side event (November 11) titled **100% "Renewables, Local Climate Solutions in Africa, Europe, South Asia"**, in cooperation with Danish 92 Group - Forum for Sustainable Development, Nordic Folkecenter for Renewable Energy (NFRE), Sustainable Environmental Development Watch (SusWatch - Kenya), and SustainableEnergy (SE, Denmark)
- **Exhibition** (November 10-15) organized in cooperation All India Women Conference, NFRE and SE (Denmark) in cooperation with INFORSE regions of South Asia - East Africa – Europe.
- Presentation (November 14) at the World Green Economy Organisation Pavillon on **Sufficiency as the Third Pillar of Transition to Climate Neutrality**

INFORSE also followed the negotiations in cooperation with Climate Action Network, where INFORSE is an active member, participated on side events and demonstration.

Proceedings and more information are available at: <https://www.inforse.org/cop30.php>

INFORSE-Europe also participated at as part of the global **INFORSE at UNFCCC SB62 in Bonn**, June 20-25, 2025, following negotiations and side events on just transition by Climate Action Network, the Gender and Women constituency, and the antinuclear movement.

Sufficiency as Climate Action & for Sustainable Lifestyles in Nordic & Baltic Countries & Belarus

Sufficiency as Climate Action for Sustainable Lifestyles in Nordic & Baltic Countries + Belarus

From September 2025, INFORSE-Europe coordinated a new project on sufficiency support from Nordic Council of Ministers and with the partners The Swedish Society

for Nature Conservation, The Norwegian Society for the Conservation of Nature, Latvian Green Movement, Estonian Green Movement, and Ecohome NGO in Belarus (pt. based in Lithuania). Partners interviewed environmental and consumer organisations on their proposals and activities for sufficiency and formulated together based in proposals from each country. The activities continue after March 2026 with seminars and presentations. The objectives of the project are:

- To make sufficiency policy measures known and accepted as climate policies.
- Strengthen advocates for sufficiency policies so they better can advocate for sufficiency policy measures, and thereby ultimately achieve implementation of these policies as climate policies.
- Strengthen the basis for a successful transition to climate neutrality.

Read more about the project here: https://inforse.org/europe/Sufficiency_as_Climate_Action_Project.htm

Energy Literacy for Youth (ELY) 2024-27

energy literacy for youth **ely**

Energy Literacy for Youth

www.energyliteracyforyouth.eu

The Project **Energy Literacy for Youth (ELY)** is capacity building for youth education that supports the skills and abilities of young people to become active citizens in the fields

of climate change and renewable energy. The methods include: energy experiments, board games, role play, building the change with Lego. The target groups are young people (18-25 years old), educators and trainers, policy makers and general public. There is special focus on inclusivity, and diversity addressing the knowledge gaps among youth in marginalised groups with different socio-cultural backgrounds, disabilities, etc.

The ELY project is financially supported by the EU ERASMUS+ program.

The project partners are Open Plan Foundation (Poland, project lead), MigLAB (Germany), Youth and Environment Europe (Czechia), and INFORSE-Europe.

Project activities in the period included: Project meetings in Denmark (Environmental and Energy Office in Høje Taastrup and Nordic Folkecenter) and in partner countries. Participatory research through "Energy Adventure Room" with activities in each country. Report launched in May 2025. Preparation and finalisation of training materials.

VedvarendeEnergi INFORSE-EUROPE Together for 1.5 ACCELERATE CLIMATE ACTION IN EUROPE

Med tilskud fra Europa Nævnet og EU

In Denmark, INFORSE-Europe organized several debates, and EU Climate and Environment election debate meetings, including:

- Dialogue on EU and Danish future climate laws and targets. Copenhagen, April 9, 2025
- Dialogue on what we can use EU for, can Samsø Island get support from EU? Samsø island, April 28, 2025
- Dialogue on how we reach EU climate targets. Aarhus, May 13, 2025
- Dialogue on EU and Danish Climate targets. Copenhagen, May 14, 2025
- Climate targets in Denmark and EU dialogue with leading parliamentarian climate speakers. Bornholm Island, June 14, 2025
- Does the EU finance Denmark's climate action? Copenhagen, August 18, 2025
- How far should the EU go in climate action? Odense, August 19, 2025
- EU policy, the future of agriculture and the transition to renewable energy, August 27, 2025

Read more at: <https://inforse.org/europe/europa-naevnet.htm>

The events were supported by Europa-Nævnet, Denmark and cofinanced by SustainableEnergy Denmark via the Life+ project Together for 1.5, coordinated by Climate Action Network Europe.

Exhibition at EUSEW 2025 in Brussels

Update on INFORSE, NECPs & ELY

energy literacy
for youth

Together for 1.5
ACCELERATE CLIMATE
ACTION IN EUROPE

INFORSE-Europe had an exhibition stand at EUSEW2025 in Brussels. We presented the project: Energy Literacy for Youth - ELY, the UNFCCC NECPs Tracker and New Report by Together for1.5 Project of Climate Action Network Europe (CAN Europe).

European Policies

Ecodesign and Standards for cleaner heating

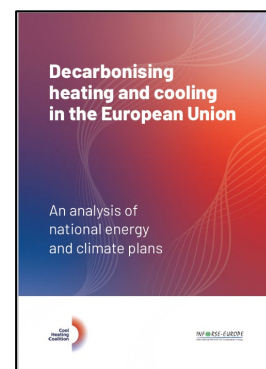

INFORSE-Europe staff worked with the European Environmental Coalition on Standards (ECOS) and the Coolproducts Campaign on EU Ecodesign regulation, EU product energy labelling, and European standards to have higher efficiency and cleaner combustion of boilers and room heater, including wood stoves that have large potentials to become cleaner.

In the period, INFORSE-Europe staff followed Ecodesign work and standardisation of boilers and heat pumps, radiators, solid fuel heaters (wood stoves), local heaters (gas, oil and electric room heaters) and cooking fume extractors (range hoods). More on EU Policies: <https://inforse.org/europe/eupolicy.htm>

Heating & Cooling in NECPs

In cooperation with the Cool Heating Coalition, INFORSE-Europe analysed national energy and climate plans on how they treated heating and cooling. The report "Decarbonising heating and cooling in the European Union: an analysis of national energy and climate plans" was launched July 17, 2025 at an online event by Cool Heating Coalition. The project was financed by the European Climate Foundation.

Read the report at: coolheatingcoalition.eu/knowledge_hub/

Other activities: Webinars – Study Tours

Study tour to Danish biogas plants by Polish Municipalities

INFORSE-Europe organized a study tour May 19-13 together with Institute for Sustainable Development in Warsaw. The representatives of municipalities saw Danish biogas plants that treated wastewater sludge, sorted, organic municipal waste, food industry waste and manure. Some of the biogas plants supplied cleaned biogas for the national gas network.

The project was supported by EU via Institute for Sustainable Development, Poland.

Webinar
Nuclear Waste - A Problem that Stays
Wednesday 17/12, 2025
15.00-16.30

INFORSE
International Network for Sustainable Energy

Webinar: Nuclear Waste - A Problem that Stays

December 17, 2025

Proceedings and More:

Cooperation with other INFORSE-regions – continued

INFORSE-Europe continued cooperation with other INFORSE regions at UNFCCC COP30, webinars, and databases.

80+ Local Sustainable Solutions in East Africa

In Kenya, Uganda, Tanzania

<http://www.inforse.org/evd>

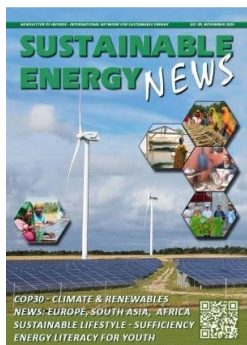

65+ Eco-Village Development solutions in South Asia

in Bangladesh, India, Nepal, Sri Lanka

<http://www.localsolutions.inforse.org/>

Outreach: Sustainable Energy News

Newsletter: With support from the projects, the No. 89 issue of Sustainable Energy News was published in November 2025. It includes news from the network, and projects of the members.

The issue was printed in 1500? copies, mailed to 900? organisational receivers and distributed at UNFCCC COP30 in Belen and at other events. The issue is available online as pdf, and a link to download it was sent to INFORSE's online contacts.

More: https://inforse.org/s_e_news.php3

Direct download of the issue: <https://inforse.org/doc/SEN89.pdf>

Outreach: Home page and Social Media

Website

The website was updated with new events, activities, and projects as well as the online contact database.

Organisational Development

At INFORSE-Europe's office we have had several volunteers, trainees, and students, who contributed to the work during the year. The heating study was implemented with extra staff from the network.
